7. RESOURCES

Textbook

There is no set textbook for this course, although the following is most closely related to its content:

Clark, R. C. & Mayer, R. E. (2008). E-learning and the science of instruction. San Francisco, CA: Wiley (available in the book store).

Recommended books (copies of first four books are provided on Moodle):

How People Learn: Brain, Mind, Experience, and School (2000). Washington, DC: National Academy Press https://www.nap.edu/download/9853#

8. ASSESSMENT

Assessment Task	Length	Weight	Course Learning Outcomes Assessed	Program Learning Outcomes Assessed	Due Date
Task 1 Minor Essay: Human cognition and its educational implications	750- 1000 words	15%	1	1,4,5	March 8 (5 pm)
Task 2 Report (essay): Review and evaluation of instructional design	1750- 2000 words	35%	2	1,2,3, 4, 5	April 5 (5 pm)
Task 3 Report (major essay): Application of design review	2500- 3000 words	50%	3	2,4	April 26 (5 pm)

Assessment Details

Assessment Task 1: Minor Essay

(750-1000 words). Human cognition and its educational implications.

Based on the suggested readings in this course, and sources you have found yourself, write your brief reflection on the importance of knowledge of human cognition for teaching and learning. Illustrate your points with specific short example(s) from the area of your teaching interest.

Reference appropriate scholarly literature and frameworks which have either been referred to in the course or which you have found yourself. All references must follow APA 6th Edition guidelines.

Assessment Task nd yourss delines.

Assessment Task 3: Report (major essay)

Application of design review (2500-3000 words)

Develop an evidence-supported argument and proposal for designing or redesigning component(s) of a course for use in your own teaching practice

In relation to the components which might benefit from a redesigned online activity and/or resource (identified in Assessment Task 2), propose how you might go about redesigning these components and provide evidence-based arguments for the proposed changes.

Considering the proposed changes, redesign some components of your course that you have identified as needing redesign to enhance students' learning experience. You may choose to redesign any number of activities, assessments, and/or resources that would be beneficial for your particular teaching context. However, a minimum of one resource, activity, or assessment should be included.

Drawing upon concepts explored in the course, scholarly literature, and your own reflections, provide a description of, and an accompanying evidence-based argument, for your revised course components (resources, activities, or assessments) including how they have changed from the original components. Include your justification (based on support from the literature) for selecting the particular techniques or an evidence-based argument for technology not being appropriate for the particular components of your course.

Reference appropriate scholarly literature and frameworks which have either been referred to in the course or which you have found yourself. All references must follow APA 6th Edition guidelines.

Submission of Assessment Tasks

Students are required to follow their lecturer's instructions when submitting their work for assessment. All assessments will be submitted online via Moodle by 5pm. Students are also required to keep all drafts, original data and other evidence of the authenticity of their work for at least one year after examination. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special
