4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

The course content covers a range of essential aspects of pedagogy specific to the teaching of Languages other than English in secondary schools. The teaching and learning philosophy underpinning this course is one of active engagement. The course is highly interactive, requiring students to participate by contributing their experience, knowledge and skills, carrying out research, involving themselves in dialogue with the lecturer and other students both in and out of class, undertaking self-reflection and taking responsibility for their own learning. The learning tasks provided will be challenging, highly practical and relevant to the teaching profession.

5. TEACHING STRATEGIES

Teaching strategies used during the course will include:

- Small group cooperative learning to understand the importance of teamwork in an educational context and to demonstrate the use of group structures as appropriate to address teaching and learning goals.
- Explicit teaching, including lectures, to demonstrate an understanding of students' different approaches to learning and the use of a range of teaching strategies to foster interest and support learning.
- Extensive opportunities for whole group and small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate and liaise with the diverse members of an education community, and to demonstrate their knowledge and understanding of method content.
- Structured occasions for reflection on learning, such as the use of learning journals, to allow students to reflect critically on and improve teaching practice.
- Online learning from readings on Moodle.

These activities will occur in a classroom climate that is supportive and inclusive of all learners.
